

James Beck of EatMoreHeat.com is my first guest on the new weekly feature of the SuperSite, and he discusses eating superhot chiles and finishing an Apocalypse Burger. Upcoming guests are Dave Hirschkop who invented Insanity Sauce; chemical engineer Marlin Bensinger, who tests the superhot chiles in his own lab; Jim Garcia of El Pinto Salsa, discussing Scorpion Salsa and the purported "chile crisis;" and Chris Fowler, who uses a polytunnel to grow chillis near Cardiff, Wales. To hear James on the first podcast, go [here](#) .
